

# SECURING MILITARY & DEFENSE

In today's age of global uncertainty and regional conflicts, military and defense operations are constantly exposed to volatile situations and potential attacks. Combat support elements and secure zones require the best in protection. Perimeters that are hardened and provide longer breakthrough delay times save valuable lives and equipment. Intrusion detection systems must be reliable under all conditions and provide accurate and early warning of attacks.

Betafence is committed to delivering durable solutions for protecting defense materiel and personnel. Our turn-key, high-security perimeter protection systems act as a strong deterrent to breach attempts. Our integrated protection systems include best-in-class technologies, such as redundant and overlapping disparate perimeter intrusion detection systems, advanced approach warning systems, thermal and analytical surveillance cameras, controlled security lighting, hardened entry/exit points, and military-grade anti-crash cables, barriers and bollards.

A strong perimeter defense is the first and most important protective cordon against a ground attack. Our global presence allows Betafence to deliver quality perimeter products and systems along with fully integrated technology solutions to protect wide-area and remote location facilities in the most challenging regions of the world.

## BETAFENCE SERVICES

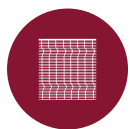

- Risk Assessment & Surveys
- Security Advice & Audits
- Architecture Features
- Design & Engineering
- Project Management
- Construction & Installation
- Systems & Technology Integration
- Testing & Communication
- On-Site Training
- Maintenance & Support

## FIT FOR PURPOSE

### Physical Perimeter

High-security Fencing Systems  
 Surface-mounted Rapid Deployment Barriers  
 Ballistic Resistant Fence  
 RPG Pre-detonation Screens  
 Crash-rated Fences  
 Crash-rated Bollards

### Perimeter Intrusion Detection System (PIDS)

Mounted | Standalone | Buried  
 Microwave  
 Radar | Laser | Infrared  
 Solar Powered

### Access Control

Gates | Turnstiles | Bollards  
 Vehicle Barriers | Tyre Killers  
 Electronic Validation  
 Security Guard Structures  
 Crash-rated Wedges

### CCTV & Lighting

True Day/Night | Thermal  
 Fixed | Pan Tilt Zoom (PTZ)  
 Intelligent Video  
 Loitering Detection  
 LED | White Light | Infrared

## ABOUT BETAFENCE

- Global leader in perimeter security solutions
- More than 130 years of excellence
- Worldwide construction reach & experience
- Specialist in high security

- Continuous innovation
- Independent testing
- Unique products
- Turnkey solutions
