

SECURING PRISONS

The constant rise in prison population is generating enormous pressure on Correctional Authorities to provide ultra-secure, high capacity facilities that protect the public, safeguard prison staff and confine offenders.

Perimeter security, containment, and stability are critical functions for institutions and require the integration of security systems into one manageable platform that provides real-time control.

Betafence understands the security challenges faced by Correctional Departments. Keeping up to date with developments and research affecting Correctional Centres, we are on top of trends and pitfalls. This is why we can offer perimeter security solutions specifically configured to each facility's needs. With the successful design and integration of perimeter solutions for some of the world's most challenging facilities & environments, Betafence has positioned itself as an intelligent and reliable partner of choice for Correctional Authorities.

Our strength lies in our ability to effectively solve current problems and mitigate future risk through carefully combining the most suitable equipment, services and technologies to create an optimal integrated perimeter security solution.

BETA FENCE SERVICES

- Risk Assessments & Surveys
- Security Advice & Audits
- Architecture Features
- Design & Engineering

CORRECTIONAL FACILITIES

We look at what you need and how best to deliver this.

Risk assessments and security audits for each facility forms part of our service and ensures that we deliver the right recommendation for your particular requirement.

We deliver quality.

Your perimeter security solution will be supported by our international Project Management teams with many years of relevant experience. Specialising in large and complex facilities in developing regions, you are assured of receiving expert advice and service.

We offer a range of high-quality, specialised and custom-fit perimeter protection products

Concept & Design

Anti Ram Barriers

Wedge Barriers

Breakthrough Testing

Ballistics Testing

Impact Testing

Microwave PIDS

Remote Monitoring

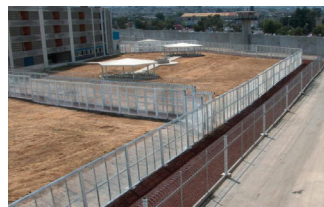

Integration & Control

- fencing systems
- high security rapid deployment barriers
- crash rated anti ram barriers
- access control
- truck stoppers
- bollards
- lighting
- gates & turnstiles
- intruder detection
- fibre & radar
- cctv surveillance
- video analytics
- remote monitoring
- non intrusive inspection
- bullet resistant fence
